## INSPECTION PROCESS

Austin Safety Services utilizes BuildingReports' to track all devices that require inspection and eliminates errors common with manual inspections. Our device-specific reporting maximizes efficiency, saves money and reduces risk by managing critical inspection data. With BuildingReports' detailed online reports, you can access specific inspection reports, authorize repairs, and view inspection schedules all from your secure cloud-based account. Additional verification features providing valuable insight and business intelligence include:

- Inspection date and time stamps for each device
- Manufacturer recalls
- Statistical analysis on each device tested
- Deficiencies detailed with embedded code references
- Recommended actions needed to meet compliance requirements
